For more than a century California Pacific Medical Center, (CPMC) part of the Sutter Health Network, has been caring for children in San Francisco. Now, in partnership with Stanford Children’s Health, we provide care in more than 25 pediatric specialty areas. Your patients and their families benefit from access to some of the nation’s top pediatric specialists, including pediatric specialists from Stanford Children’s. CPMC is a California Children’s Services (CCS)-certified tertiary-care hospital and a regional referral center.
In areas where a board specialty exists, all physicians are either board certified or eligible. CPMC is the licensee and solely responsible for the provision of the hospital service.
